Capital One

NEW YORK, NY

ASSOCIATE PRODUCT MANAGER

AUGUST 2020 - PRESENT

- Manages sprint team & makes user stories to develop a Windows 10 upgrade pipeline; deploy upgrade to all 2,200 ATMs
- Reprioritizes build and deployment timeline and delegates cross-functional processes across teams to prevent a \$100M fine, expediting deployment due to cyber compliance demands by the Office of the Comptroller of the Currency
- Leads design thinking for a cloud ATM Content Management System, shortening UI deployments from months to seconds

Accenture

NEW YORK, NY

TECHNOLOGY CONSULTING ANALYST

JUNE 2019 - AUGUST 2019

- Analyzed and updated 47 QA SQL scripts for the cloud upgrade of client's revenue management system, following SDLC
- Consulted at a pharmaceutical firm, governing SharePoint, creating kickoff deck, and leading weekly client meetings
- Socialized recycling & composting guidelines with a chat-bot hosted in AWS - built during internal Hackathon in 12 hours

Merck & Co.

KENILWORTH, NJ

EMERGING TECHNOLOGY BUSINESS ANALYST

JUNE 2018 - AUGUST 2018

- Increased users of the Innovation Room by 20+/week by redesigning the room with intuitive UX and building a kiosk app to showcase Merck's new technology; publicized improved room by hosting and leading demos of products and features
- Developed and monitored a SharePoint dashboard for an extensive digital transformation project in an Agile environment

Rutgers University Career Services

NEW BRUNSWICK, NJ

DATA AND TECHNOLOGY ANALYST

JUNE 2017 - MAY 2019

- Provided technical support to resolve 50+ issues/week regarding Office 365, networks, printers, Web, Windows, and Mac
- Identified fraudulent employer trends with Tableau and recommended solution to eliminate 40% of student scams

Projects

AssetManager

LITTLE FALLS, NJ

PERSONAL FINANCE ANDROID APP

JUNE 2020 - JULY 2020

- Visualize a user's assets and budgets by consolidating their checking, brokerage, retirement, and credit accounts' data
- Implement Node.js and Express for a REST API web server, MongoDB for database, and Java for a front-end Android app

Autonomous UAV Human Reconnaissance

NEW BRUNSWICK, NJ

SENIOR DESIGN PROJECT: SIXTH PLACE OUT OF 70

MAY 2020

- Automate a drone using Machine Learning and Computer Vision to optimally search and rescue people post disaster
- Drop a marker and first-aid resources at the site of the human, and send the GPS coordinates to first responders for rescue

Facial Recognition Home Security Automation

NEW BRUNSWICK, NJ

SOFTWARE ENGINEERING FINAL PROJECT

MAY 2019

- Work in team to create an IoT security system that disarms alarm at sight of recognized faces, configurable through an app

KPMG Tableau Case Competition

NEW BRUNSWICK, NJ

FIRST PLACE

APRIL 2019

- Visualize Citi Bike data with Tableau to recommend strategy to increase revenue by 7% and improve user satisfaction

Leadership

Engineers without Borders - Rutgers University

NEW BRUNSWICK, NJ

WEBMASTER (PREVIOUSLY: TREASURER)

SEPT 2016 - MAY 2020

- Increased AUM by 20% to \$100,000 and budgeted two trips to Guatemala and Tanzania for borehole well installations
- Led web developer meetings to create new website resulting in 350% more page views and 40% more corporate sponsors

Engineering Governing Council
